

BIRO - TONOMETER - a new generation instrument from Germany - in quality that lasts!

- 1.) Anodized scale mount - highly resistant to sterilizing wear.
- 2.) Pointer and lever -made of hardened stainless steel (Rockwell HRC 54). particularly appropriate for the manufacture of instruments; consequently no risk instruments; consequently no risk of pointer bending. Very attractive, gold plated design.
- 3.) Finger rest and transversal support -black (chromium-plated), modern, pleasant design.
- 4.) 10 gram and 7.5 gram weight units -with V-shaped keyway slit; for easy introduction of weight unit into tonometer.
- 5.) Metal case - modern, finely padded steel case. For safe storage and protection of your BIRO-TONOMETER.
